

## Pressing and Piercing Machine TAIHEI Model : TP-60

### Features :

In-line and one operation pressing and piercing operation with wire forming.

Promising remarkable enhancement of productivity and curtailment of production cost.

### Features

- 1) Pressing and piercing operation while maintaining axes of wire (no deviation)
- 2) Shortened process time because pressing and piercing is done within the same die holder.
- 3) Die set type mold setting. Easy to set or demount. (quick and easy maintenance)
- 4) Wire elongation by pressing operation is automatically compensated.

Capability :      Pressing Operation : 60 ton/max. hydraulic press  
                          Piercing Operation : 13.5 ton/max. hydraulic press  
                          Pressing and piercing speed : 7 seconds

Wire End Pressing and Piercing Machine  
***TP-60 Specification***

Model Number : TP-60

Description	Specification
Pressing operation	60 ton/max. hydraulic press
Piercing operation	13.5 ton/max. hydraulic press
Mold setting	Die set system
Press centering mechanism	Ball screw follow-up mechanism
Standard Accessory	Scrap ejection mechanism
	Wire positioner
	Wire elongation compensator
Machine dimension	835(L)×1,420(W)×1,640(H)
Machine weight	1,300kgs
Power requirement	3-phase AC200V 50/60Hz 2KVA

( May 2010)

♪ Specifications hereof are subject to change without notice.
